THE MINISTER OF STEEL (SHRI RAM VILAS PASWAN): (a) The customs duty on import of steel melting scrap is already nil.

(b) Does not arise in view of (a) above.

(c) and (d) In the National Steel Policy (NSP) it has been envisaged that by 2019-20 the country would attain an indigenous steel production of 110 MT and a consumption level of 90 million MT.

In order to achieve this goal, the NSP seeks to remove the supply-side constraints to the growth of Indian steel industry in an open, globally integrated and competitive environment. The NSP seeks to adopt a multi-pronged strategy to move towards the long-term policy goal. On the demand side, the strategy would be to create incremental demand through promotional efforts, creation of awareness and strengthening the delivery chain, particularly in rural areas. On the supply side, the strategy would be to facilitate creation of additional capacity, remove procedural and policy bottlenecks in the availability of inputs such as iron ore and coal, make higher investments in R&D and encourage the creation of infrastructure such as roads, railways, and ports.

(e) Does not arise in view of (c) and (d) above.
